

Maryland State Highway Administration Annual ADA Status Report January – December 2010

Transition Plan

The ADA Transition Plan has been completed and submitted to FHWA. The Office of Highway Design (OHD) has created a GIS based ADA Portal that will assist with the prioritization of projects in the Transition Plan. The prioritization criteria include the location of government services, locations of places of public accommodation (health care facilities, senior centers, etc.), access to transit, the presence of pedestrian incidents, and public input. SHA has developed an approach to prioritize projects using GIS to identify areas with the factors listed above. Areas meeting multiple screening criteria will be ranked higher than those not meeting the criteria. Projects will be grouped into three categories representing varying levels of priority. Projects would then be funded and implemented by priority. Work continues on the projects identified by the prioritization process to bring them into full ADA compliance as described below.

ADA Retrofit Projects

SHA has initiated and/or completed the design and construction of many projects to bring our existing facilities into full ADA compliance. In 2010, American Recovery and Reinvestment Act of 2009 (ARRA) funds were utilized for ADA Retrofit Projects. All of the construction work was done under the ARRA and the amount of these funds, used for ADA Compliance (as of December 31, 2010), was \$ 7.9 million. Currently, 58 projects have been completed, 45 are in design and 9 are in construction. These numbers represent the ongoing efforts in 14 of the 23 counties in Maryland. A complete list of ADA Retrofit Projects is attached.

Accessible Pedestrian Signals

Progress continues in the area of APS. As of December 2010, there are 549 locations where APS are under construction or complete.

There are approximately 420 intersections in design for APS, including both reconstruction and new traffic signals. Of these, approximately 180 are scheduled for PS&E through December 2011 and approximately 240 are scheduled beyond 2012 or are unscheduled because they are tied to other State or developer projects with uncertain schedules or lack resources.

Training

Construction training continued, and as of December 2010, one hundred eighty-seven (187) people attended the construction training. The participants included utility companies, county staff, SHA staff and contractors. Additionally, SHA has provided thirty (30) people with ADA design training.

SHA continued its mandatory ADA Awareness training for all SHA employees, and has successfully, trained more than 3,000 employees (over 93% of SHA employees). Currently, this training program is available on-line training to provide training to remaining and future employees.

Maryland State Highway Administration Annual ADA Status Report January – December 2010

Facilities Review

The SHA facility review of headquarters, regional offices, maintenance shops, landscape depots, district offices, regional labs, and welcome centers was completed in 2009. SHA is currently finalizing a Self-Evaluation that will discuss the findings of the facility review. The accessibility surveys have been conducted to determine if the buildings are in compliance with the current ADAAG. A Transition Plan is being drafted to address the deficiencies found in the facilities and a schedule is being developed to correct any deficiencies that are required to be made. It is important to note that SHA reviewed all of its facilities even through some pre-date ADA requirements and thus are not required to be brought up to current standards. All facilities regardless of age were also assessed in terms of use for public/community meetings. SHA is developing a policy to provide guidance on the use of these facilities for public/community meetings while ADA deficiencies are being addressed.

Sub-Recipient Policy

SHA has initiated and continues to work on a sub-recipient policy that will clearly define sub-recipients obligations and SHA's oversight role in monitoring sub-recipients to ensure their compliance with Title II of the ADA and Sec. 504 with respect to STA-funded (both federal and state dollars) projects. SHA hopes to complete this policy and distribute it to sub-recipients in early 2011.

**ADA Compliance Program Projects that are In Design, Construction, and
Complete as of December 2010**

Anne Arundel County

MD 648 - from Holloway to Marley Neck Drive. SOUTHBOUND

- 1,745 LF of sidewalk improvements
- Construction Complete

MD 648 - from Marley Neck to Marley Park Church NORTHBOUND

- 345 LF of sidewalk improvements
- Construction Complete

MD 648 - North Star Drive at Farmington Village Entrance

- 555 LF of sidewalk improvements
- Construction Complete

MD 177 - from Edwin Raynor Blvd to Rite Aid entrance WESTBOUND

- 660 LF of sidewalk improvements
- Construction Complete

MD 177 - from Sprague to 100' west of Mountain View

- 100 LF of sidewalk improvements
- Construction Complete

MD 177 - Waterford Road at Quick Food Mart EASTBOUND

- 100 LF of sidewalk improvements
- Construction Complete

MD 177 - from Chesapeake High School to Long Point Road

- 650 LF of sidewalk improvements
- Construction Complete

MD 176 from MD 648 to Author Slade School & Pascal Senior Center

- 500 LF of sidewalk improvements
- Construction Complete

MD 177 - Catherine Ave Intersection

- 350 LF of sidewalk improvements
- Construction Complete

MD 648 - from MD 177 to Phyllis Drive

- 3,234 LF of sidewalk improvements
- Construction Complete

MD 168 - from Raynor Road to Barkwood Court

- 380 LF of sidewalk improvements
- Construction Complete

**ADA Compliance Program Projects that are In Design, Construction, and
Complete as of December 2010**

MD 450 at Goodhope Rd Interserction

- Intersection Upgrade (All sidewalk, sidewalk ramps, and pedestrian signals upgraded)
- Construction Complete

MD 198 - from Old Annapolis Road to Russet Green EASTBOUND

- 2,500 LF of sidewalk improvements
- Construction Complete

MD 169 @ MD 170

- 1,500 LF of sidewalk improvements
- Construction Complete

MD 198 - from Old Annapolis Road to Russet Green WESTBOUND

- 3,000 LF of sidewalk improvements
- Construction Complete

MD 170 - from MD 175 to MD 32

- 1,960 LF of sidewalk improvements
- Construction Complete

MD 70 - from Lawrence Road to mile marker 2.35. NORTHBOUND

- 1,100 LF of sidewalk improvements
- In Construction

MD 177 - Outing Ave Intersection

- 1,508 LF of sidewalk improvements
- In Construction

MD 177 - 200' each side of Sagamore Way Court EASTBOUND

- 470 LF of sidewalk improvements
- In Construction
